UKRAINE

Introduction.

Today’s European integration processes are leading Ukraine to find ways to integrate into the European educational space as well as to preserve its identity, which is the property of previous generations.

Global competitiveness applies not only to the economy or politics, also to high intellectual quality of countries as well as increasing civil activity and patriotic consciousness of youth. The XXI century focuses on an important role of education, science, innovation, the quality of human capital and civil activity of youth.

Now Ukraine directs its intellectual resource to cultivate a national-patriotic feeling based on the love to its country, people, nation, state, affirmation of Ukrainian civic identity.

The strategy of patriotic and civil education.

Patriotism and Civil activity of youth have a great impact on the intellectual development of the country. The youth, being a driving force of the society, should serve and express feelings of patriotism for homeland which is a main task for Ukraine to achieve its ambitious goals in strategic development.

The main directions of achieving the goal of the strategy:
- improving the legal framework for national and patriotic education;
- enhancement of the role of the Ukrainian language as a national value and an integral element of national-patriotic education;
- promotion and distribution of Ukrainian-language cultural product;
- implementation of projects and activities aimed at enhancing the prestige of military service; streamlining and improving the system of pre-draft military training;
- ensuring proper organization of research and methodological work in the field of national patriotic education;
- development and implementation of modern educational systems, technologies and methods in the field of national-patriotic education, generalization and dissemination of the best experience in this field;
- introduction of disciplines of spiritual and moral orientation as the basis of personality formation and foundation for national-patriotic education, which are based on the traditions of the Ukrainian state-formation;
- support and development of family traditions, active involvement of the family in the process of national patriotic education;
- development of common approaches in the field of national-patriotic education in the activity of state and local self-government bodies;
- increase of professional competence of specialists in the field of national patriotic education, establishment of constructive interaction, social partnership between subjects of national patriotic education;
- promoting the establishment of centers of national patriotic education and development of the direction of national patriotic education in youth centers;
- ensuring coordinated activity of state and local self-government bodies in the field of national-patriotic education;
- organization and coordination of outreach work in the field of national patriotic education;
- prevention of negative behavior, crime, drug addiction, alcoholism, especially among children and young people, in particular by engaging in activities in national patriotic and spiritual and moral education;
- developing cooperation with European Union and NATO Member States that are successfully implementing projects and activities in the field of national patriotic education; creation of a system of effective monitoring and research in the field of national patriotic education.

**Conclusion.**

Thus, patriotism and is a reliable and effective means of instilling Ukraine. In the process of forming a sense of patriotism, civil consciousness, Ukrainian national identity, the complex system of national-patriotic education that penetrates educational institutions, children’s and youth public organizations, and other self-governing associations must play a key role. The effectiveness of the system as a whole, the activities of state in particular depends on a clear system patriotic education. The solution of this problem is actual, complex, cross-sectoral and interdisciplinary
